

Snowman Face Changing Card

Speaking of snowmen, this fun and festive idea changes the whole “face” of Christmas cards! With cardstock and some small family photos, you can easily create a sliding tab that changes the snowman’s face to the smiling photos of your family!

- First, download the pdf templates for this card and print the 8.5 x 11 card onto cardstock.

- Print copies of your family's faces around 1 inch tall (use a photo editor if you need to resize your pictures).

- Print the picture strip template onto cardstock. Then tape your family's pictures to the strip making sure you line up their eyes.

- Using a craft knife, cut a slit along the mark to the right of the snowman and cut out the circle in the snowman's face.

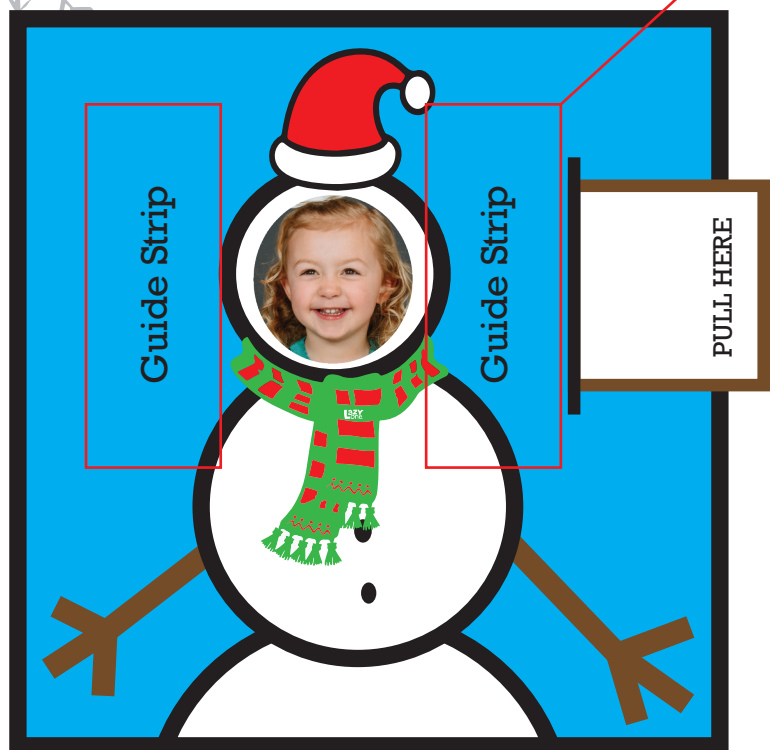

- Turn the card over and tape guide strips to the inside of the card, lined up with the slit to act as a guide for the image strip.

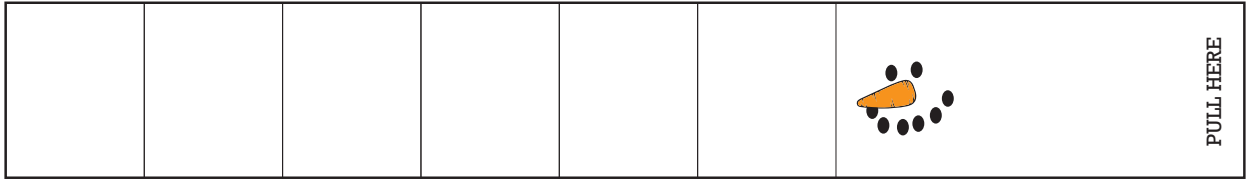

- Slip the image strip face down under the guiding strip and through the slit.

- Add a holiday greeting.

Place guide strips on back side of card
